

## **Interfix at a glance:**

### **INTERFIX ALLOWS YOUR ENTIRE HEALTHCARE ENTERPRISE TO QUICKLY AND COST EFFECTIVELY:**

- Use a single preferred format for all voice and document files sent and received (regardless of input system)
- Share dictation and transcription resources
- Negotiate outsourcing contracts (taking advantage of economies of scale)
- Benefit from open outsourcing options, improving turnaround time and eliminating transcription backlogs
- Ease reliance on internal IT, because ADT and HIM interfaces are developed and implemented quickly
- Ensure HIPAA requirements are met by business associates and vendors
- Normalize patient records, regardless of source system

## **Interfix formats:**

- ADT Inbound and Outbound functions are easily accommodated. HL7 2.3 Standard Inbound and HL7 2.3 Standard Outbound formats are accepted and managed. Connectivity modules include: Eclipsis™, MediTech™, Oacis™, Epic®, Cerner®, McKesson HBO&Co. Siemens SMS, plus hundreds of other mainstream HIS and CIS platforms.
- Transcribed reports are automatically reformatted for import or delivery. Hundreds of format types are available, including: HL7 (any version), xml, ChartScript®, Medquist™ VXP, Dictaphone® iChart® or Enterprise Express® Text, Vianeta, and Lanier/CareFlowNet.
- InterFix audio modules provide access and interoperability between more than 100 converted audio file formats, including: DVI, Lanier VoiceLink™, Dictaphone iChart® and Enterprise® Express Voice System, Vianeta, Crescendo and most PDA formats.
